

COVID-19

SAFE19

COVID-19 CLEARINGHOUSE

A POST-PANDEMIC WORLD

As COVID-19 incidence in the U.S. begins to decline, a new phase of the pandemic management will be required to avoid resurgence of the virus and allowing individuals to return to work and school.

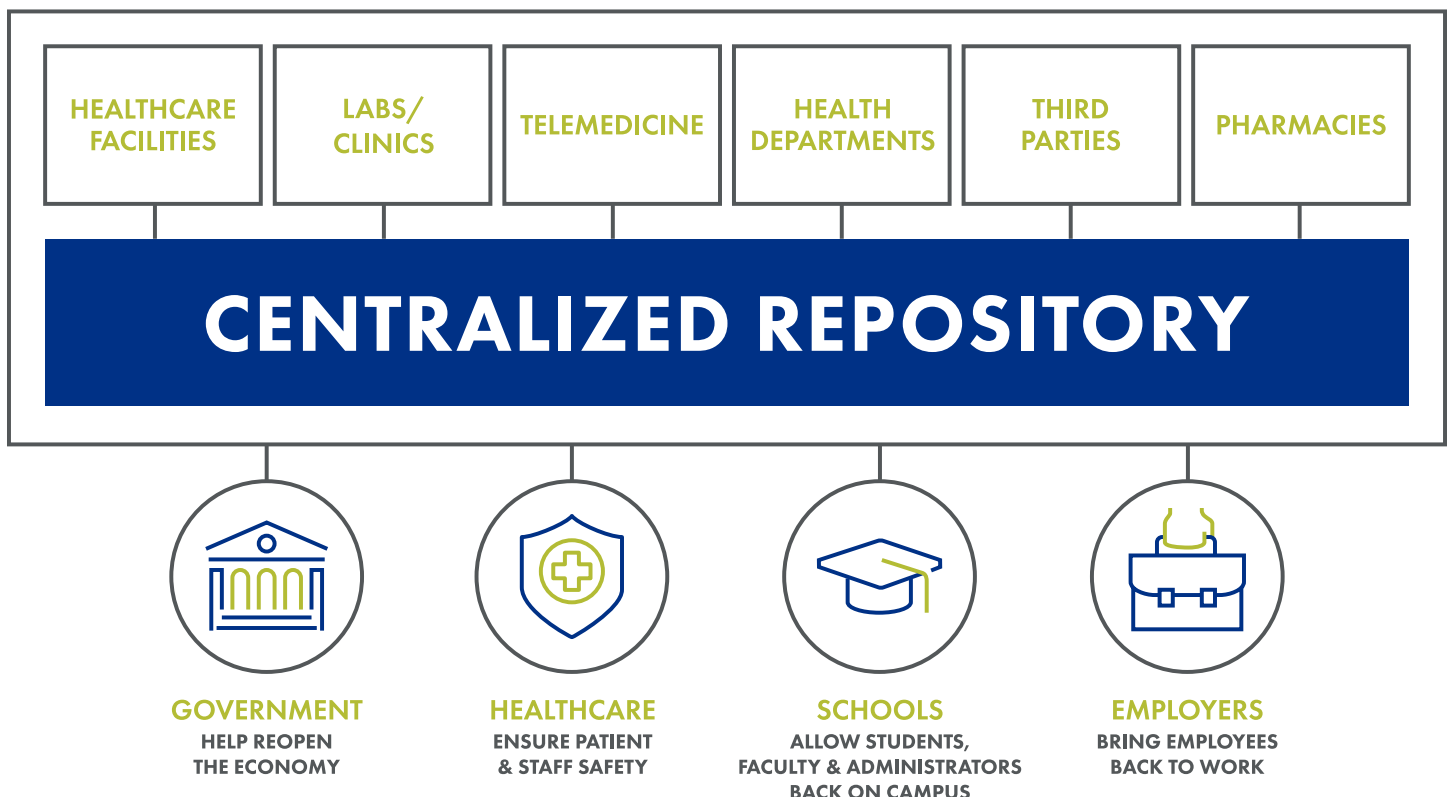

OUR SOLUTION

With SAFE19's central repository, information would be stored regarding individuals who have tested for COVID-19 and the result of those tests along with antibody testing and vaccination records, once available. This repository would allow employers, healthcare facilities, education institutions and government agencies to determine if their employees and students are safe to return to their work environment and classrooms, helping reopen the economy in a safe, secure manner.

FCRA AND HIPAA COMPLIANT

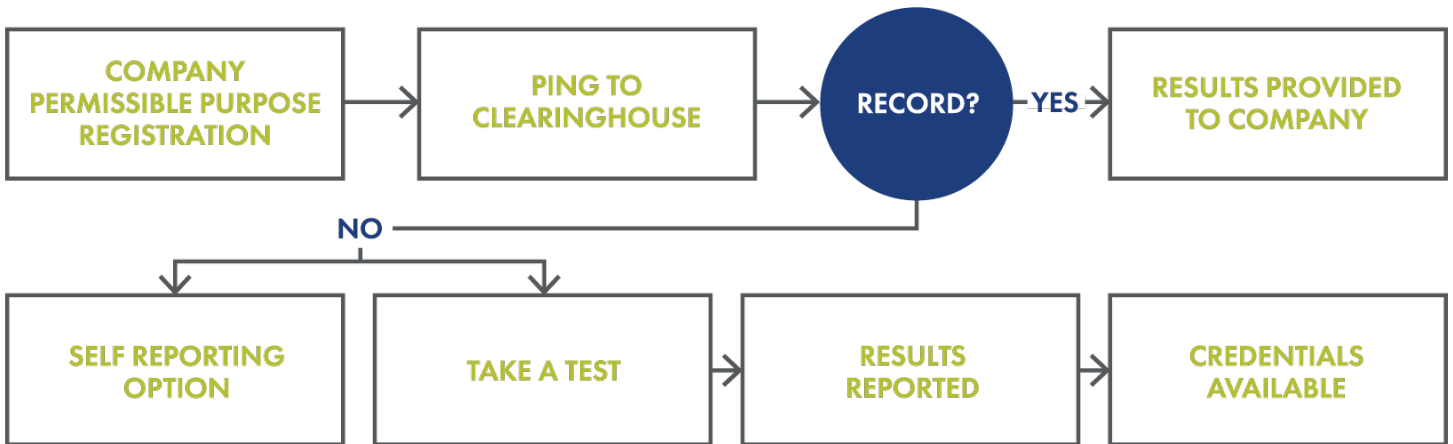

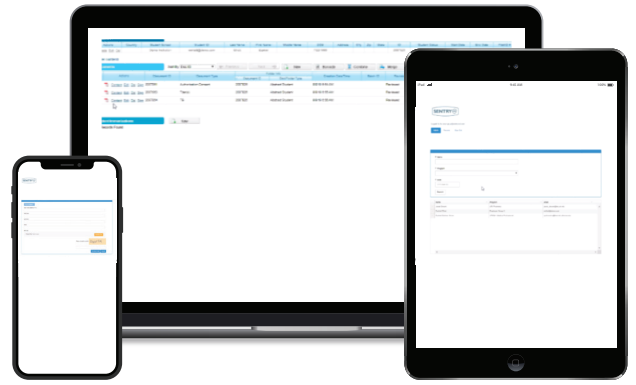

SAFE19 delivers a solution that is federal Fair Credit Reporting Act (FCRA) compliant and is supported by an experienced team of compliance experts fully versed in all aspects of the regulations.

SAFE19 protects public health data and eliminates privacy concerns with our 100% HIPAA (Health Insurance Portability and Accountability Act) compliant solution.

TECHNOLOGY ENABLED, FULL SERVICE SOLUTION

- Mobile app credentials for site access.
- Real-time ability to update records via mobile badge.
- Document upload capabilities.
- Dedicated service support for all users.
- Confirmed authenticity of testing with dispute resolution.

PROTECT LIVES. PROTECT PRIVACY. ENSURE SAFETY.

SAFE19 is a secure, paperless, central repository specifically designed to handle the uploading, validation, and compliance reporting on COVID-19 test and immunization data. Our data-driven solution has the flexibility to evolve as vaccines and various testing options are approved by the FDA.

SAFE19 has the capability to use the users' profile data and immunization status to generate a digital badge to prove their immunity before returning to work, providing care, and so forth.
